

National Power Presents "Mission Critical Customers' Power Resilience and Reliability Needs" at the Electricities 2022 Conference

Raleigh, N.C., August 8, 2022 – National Power announced that Chris Hutter, its Chief Executive Officer, today presented at the Electricities 2022 Annual Conference in Cherokee, N.C. Chris's discussion, entitled "Mission Critical Customers' Power Resilience and Reliability Needs", shared insights and trends from customers across the U.S. The presentation discussed the major drivers impacting mission-critical customers' power and infrastructure needs and key drivers, including:

- 1. The need to strengthen power reliability and resilience due to the growth in downtime cost and threats.
- 2. The continuing massive investment in mission-critical communications and data infrastructure.
- 3. The electrification of industry and increased criticality of power due to the growing concentration of loads per foot.
- 4. The proliferation of distributed energy resources and ESG mega-trend.
- 5. Mission-critical customers' demand for power and infrastructure providers who have strong technical capabilities, and who can solve complex problems on-site and real-time with local experts.
- 6. Key bipartisan government programs stimulating investment in power and critical infrastructure.

Chris Hutter, National Power's Chief Executive Officer, stated, "We are excited to attend the Electricities conference again this year, and thrilled to be able to discuss the trends we see in mission-critical customers' power and infrastructure needs. We are grateful for the amazing work that Electricities does for our communities in North Carolina, and proud to be this year's Diamond Sponsor."

About National Power

At National Power, everything we do is focused on delivering reliability and resilience to mission critical customers. Our power and infrastructure solutions lead the industry, with a deep and broad set of capabilities that include standby power, AC and DC power systems, batteries and energy storage, renewables, HVAC, UPS systems, power quality, and disaster recovery. Our team is built to serve the needs of sophisticated customers whose operations simply cannot be interrupted. This includes customers in the broadband, telecom, healthcare, manufacturing,

municipal, water/wastewater, military, retail/distribution and other critical industries. We have delivered thousands of successful projects over decades. We also provide on-going preventative maintenance and emergency service – bolstering the reliability of our solutions. We serve customers coast-to-coast, with teams built locally.
